Text Tutor

These commands are used to display instructional or conditional text within your guide steps. You can add notes, set objective text, and target specific classes, races, or game versions to show or hide content accordingly. Especially useful for creating dynamic and personalized guide experiences.

Text Tutor

*Text	Creates a note in the step window but not the guide/map
" +Text"	Objective text box
>>Text	Default text, can be on its own line or after a syntax
<< Class (<< Race)	Shows text to one class or race
<< Class/Class/Class	Shows text to multiple class/races
<< !Class	Shows text to everyone but that class or race
<< !Class !Class	Shows text to everyone but those classes/races
<< tbc << wotlk	Skips step if server is not on a tbc or wotlk patch

Text Tutor

How to combine: Spaces are an "AND" operator, "/" is an "OR" operator, "!" is a "NOT" operator. Priority system is "!" > "Space" > "/"

.xp Expert

These commands control how experience grinding steps are handled in your guide. You can specify the exact level or experience percentage to grind to, set conditions to skip or complete steps based on the player's current level or progress, and control step visibility depending on level thresholds. Ideal for precise leveling instructions tailored to the player's current XP status.

.xp Expert

.xp 10	Makes you grind to level 10
.xp 10+200	Grind to level 10 and 200 exp
.xp 10-300	Grind to til you are 300 exp from level 10
.xp 10.5	Grind til 50% into level 10
.xp 10.5,1	Skip step if you are above 50% of 10
.xp <10,1	Completes step if below level 10
.maxlevel X	Skips step if you're above level X
#level n	Step will only show if player is greater or equal to n. Only use on stickies! Use .maxlevel otherwise

Quest Coach

These commands help automate and track quest-related steps within your guide. They cover accepting, completing, turning in, and abandoning quests, as well as tracking quest objectives and reputation requirements. Additionally, commands can check quest status (complete, available, turned in), handle daily quests, and scan for relevant units. Ideal for creating smooth, responsive questing instructions that adapt to the player's progress.

Quest Coach

.collect	(.collect,itemId,n,questID,skipIfTurnedin) Auto completes the step when you have n items of itemId, or if you have accepted questId (questId is optional, set skipIfTurnedin to 1 if you want the task to complete if the quest is turned in already)
.collect objBitMask	.collect itemId,amount,questId,objectiveBitMask,-1 --
.complete id,obj	Track quest objective
.accept id,n,nid	Accepts quest id.
.turnin id,n	Turns in quest id. N autoselects the nth reward.
.abandon id	Abandons quest id
.isQuestComplete id	Skips step if quest is incomplete
.isQuestTurnedin id	Skips step if quest id isn't turned in
.isQuestAvailable id	Skips step if quest id isn't able to be accepted
.isOnQuest id	Skips step if quest id isn't in quest log, can also add a "-" before a quest id, ie ".turnin -1234 >>" applies .isOnQuest to that quest, good for steps w/ multiple quests
.unitscan	Adds unitscan of enemy
.reputation	.reputation factionID,standing,value -- completes when you have required rep
.daily id1,id2,id3,id4	Accepts daily quests, completes when u accept atleast 1
.dailyturnin id1,id2,id3,id4	Turnsin daily quests, completes when u turnin atleast 1

Misc Mentor

These miscellaneous commands add extra functionality and convenience to your guide steps. They include clickable links, death skip instructions, skill level checks, cooldown timers, conditional step visibility based on zones, and special instructions like taming animals for hunters. Perfect for enhancing interactivity and tailoring steps to specific player conditions.

Misc Mentor

.link url	Clickable hyperlink in step
.deathskip	Tells the player to go die. Completes on spirit rez
.skill Name,n,skipStep	Completes if skill is = or greater than n

Misc Mentor

<code>.cooldown</code>	<code>type,id,timeRemaining,updateOnlyOnce</code>
<code>.zoneskip zoneNameorID,1</code>	Skips the step if player is in the given zoneID. Adding a 1 reverses the logic, shows the step only to people in that zoneID.
<code>.timer timeInSeconds,Timertext</code>	Latches to <code>.accept</code> or <code>.turnin</code> directly above and shows a timer bar.
<code>.tame npcID</code>	Instructs hunters to tame the specified animal id

Inventory Instructor

These commands manage inventory-related actions within your guide. They allow you to buy and use items, deposit or withdraw items from the bank, check money amounts to conditionally skip steps, destroy items, and verify item counts. Useful for guiding players through item management tasks efficiently.

Inventory Instructor

<code>.buy id,n</code>	Purchases item with id from vendor
<code>.use id</code>	Creates clickable item window
<code>.bankwithdraw id1,id2</code>	Withdraws items from bank
<code>.bankdeposit id1,id2</code>	Deposits items into bank
<code>.money <0.01</code>	Skips step if you have less than 1 silver
<code>.money >0.01</code>	Skips step if you have more than 1 silver
<code>.destroy id</code>	Completes obj if you destroy item
<code>.bronzetube</code>	Skips step if player has a bronze tube or has completed duskwood BT quest
<code>.itemcount id,n</code>	Skips step if user doesn't have n or greater of item id

NPC Conversation Counselor

These commands help automate interactions with NPCs, such as talking to trainers, learning spells, using flight masters, stables, or vehicles, and setting or using your hearthstone. They ;

include options to skip NPC dialogue and perform emotes at specific NPCs. Ideal for streamlining NPC-related guide steps and reducing manual player input.

NPC Conversation Counselor

.trainer	Obj completes when you talk to a class trainer
.train spellID	Obj to train specific spell
.fly / .fp	Use flightmaster ""fly Menethil Harbor" / Get flightpath
.stable id	Obj completes when you talk to a stable master, id optional
.skipgossip	Skips dialogue with npcs
.home / .hs	Set hearthstone / Cast hearthstone
.vehicle id	Obj completes when vehicle ui shows up
.emote EmoteToken,NPCID	Emotes at npc - see comment for emote ids

Header Hero - All steps must eventually autocomplete~!

These commands control step visibility, completion, and conditional progression within your guide. You can create persistent steps (#sticky), set steps to complete automatically when others finish (#completewith), label steps for referencing (#label), and set dependencies (#requires). Additionally, server-specific headers allow showing or hiding steps based on reputation, game phases, expansions, or gameplay modes (e.g., hardcore). Essential for managing guide flow and adapting to different server environments.

Header Hero - All steps must eventually autocomplete~!

#sticky	Step won't disappear until completed
#completewith next	Step completes once next step is finished - good for ending stickys
#label MyLabel	Labels the step as MyLabel
#completewith MyLabel	Step completes once MyLabel is complete - good for ending stickys
#requires MyLabel	Step will only show up if MyLabel is complete
TBC Headers	
#scryer	Skips step if rep with scryers is below friendly
#aldor	Skips step if rep with aldor is below friendly

Header Hero - All steps must eventually autocomplete~!

Vanilla Headers

#phase1-4 Step only shows if server is phase1-4

#phase5 Step only shows if server is phase5+

#era Only shows step on era servers
